4. Possible side effects
5. How to store Benzoate 25%w/v Application
6. Further information

1. **WHAT BENZYL BENZOATE 25% W/V APPLICATION IS AND WHAT IT IS USED FOR**

The name of your treatment is Benzyl Benzoate 25%w/v Application. It is a smooth white creamy emulsion.

Benzyl Benzoate 25%w/v Application contains benzyl benzoate 25%w/v as the active ingredient.

This application is used for the treatment of scabies and pediculosis (ie hair or body lice).

SCABIES is a persistent itchy skin eruption caused by cutaneous infestation with mites. The itch is worse after bathing and at night. Scabies affects all races and social classes world wide.

PEDICULOSIS is a relatively common problem in school children in various parts of the world. Females of all ages are more frequently infected than males. There does not appear to be any direct correlation between hair length and infestation rates.

2. **BEFORE YOU USE BENZYL BENZOATE 25%W/V APPLICATION**

Do not use Benzyl Benzoate 25%w/v Application

- If you are allergic to benzyl benzoate or any of the other ingredients of this medicine listed in section 6.

Warnings and Precautions

- Skin can become red and irritated at the site of application.
- Cetostearyl Alcohol may cause local skin reactions (e.g. contact dermatitis).
- Direct contacts should be treated.
- If no improvement occurs consult the doctor.
- E218 Methyl Hydroxybenzoate & E214 Ethyl Hydroxybenzoate may cause allergic reactions (possibly delayed)

Other medicines and Benzyl Benzoate 25% w/v Application

- Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines.

Pregnancy, breast-feeding and fertility

- Ask your doctor or pharmacist for advice before taking any medicine.

Benzyl Benzoate 25% w/v Application contains emulsifying wax (cetostearyl alcohol, sodium laurilsulfate, Purified Water), Phenoxyethanol, E218 Methyl Hydroxybenzoate, E214 Ethyl Hydroxybenzoate and Purified Water.

3 HOW TO USE BENZYL BENZOATE 25%W/V APPLICATION

- Treating Scabies

Apply thoroughly to the entire body omitting the head and face. Thorough bathing with a complete change of clothing and bedding should follow. All contacting clothes and bedding should be washed and/or cleaned. Repeat the following day and if necessary within 5 days.

- Treating Pediculosis

Apply to affected area and allow to remain on for 24 hours, then wash thoroughly. In severe cases 2 or 3 treatments may be required. Thorough bathing with a complete change of clothing and bedding should follow. All contacting clothes and bedding should be washed and/or cleaned.

- Children and Infants

Benzyl Benzoate Application may be diluted with an equal quantity of water for older children and with 3 parts of water for infants.

If you use more Benzyl Benzoate 25% w/v Application that you should

Treatment of poisoning involves aspiration and lavage and appropriate symptomatic measures.

If you forget to use Benzyl Benzoate 25% w/v Application

Apply Benzyl Benzoate Application as soon as you remember it.

4 POSSIBLE SIDE EFFECTS

Benzyl Benzoate Application may cause irritation to the eyes and mucous membranes (e.g nostrils, mouth, lips, ears and genital area). If swallowed or following excessive topical use Benzyl Benzoate 25% w/v Application may cause uncontrolled shaking of the body. If you experience any of these symptoms please see your doctor or pharmacist or in severe cases go to your nearest Accident and Emergency Department.

5 HOW TO STORE BENZYL BENZOATE 25% W/V APPLICATION

Keep out of reach and sight of children. Store below 25°C. Do not use this medicine after the expiry date which is stated on the label after EXP. The expiry date refers to the last day of that month. Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help protect the environment.
