

LIST OF NARCOTIC DRUGS UNDER INTERNATIONAL CONTROL

Prepared by the

INTERNATIONAL NARCOTICS CONTROL BOARD*

Vienna International Centre
P.O. Box 500
A-1400 Vienna, Austria
Internet address: <http://www.incb.org/>

in accordance with the

Single Convention on Narcotic Drugs, 1961**

Protocol of 25 March 1972 amending the Single Convention on Narcotic Drugs, 1961

* On 2 March 1968, this organ took over the functions of the Permanent Central Narcotics Board and the Drug Supervisory Body, retaining the same secretariat and offices.

** Subsequently referred to as "1961 Convention".

Purpose

The Yellow List contains the current list of narcotic drugs under international control and additional relevant information. It has been prepared by the International Narcotics Control Board to assist Governments in completing the annual statistical reports on narcotic drugs (Form C), the quarterly statistics of imports and exports of narcotic drugs (Form A) and the estimates of annual requirements for narcotic drugs (Form B) as well as related questionnaires.

The Yellow List is divided into four parts:

- Part 1** provides a list of narcotic drugs under international control in form of tables and is subdivided into three sections:
- (1) the first section includes the narcotic drugs listed in Schedule I of the 1961 Convention and/or Group I of the 1931 Convention;
 - (2) the second section includes the narcotic drugs listed in Schedule II of the 1961 Convention and/or Group II of the 1931 Convention; and
 - (3) the third section includes the narcotic drugs listed in Schedule IV of the 1961 Convention and/or Group II of the 1931 Convention.

Each section contains tables with 4 columns:

- In the *1st column*, the International Drug System (IDS) Codes are provided for each scheduled narcotic drug. These codes are assigned to the controlled drugs in the INCB/UNODC drug control system databases containing all submitted statistical data. Narcotic drugs in Forms A, B, C submitted in XML format are as such encoded and can then be directly uploaded into the international drug control databases.
- In order to facilitate identification of all scheduled narcotic drugs, existing CAS (Chemical Abstracts Service) registry numbers are included in the *2nd column*. Please note that the absence of a CAS number does not mean that the narcotic drug concerned is not under international control but that the CAS registry number has not been available, as it is the case in some scheduled plant material.
- The drug names listed in the *3rd column* correspond to the ones assigned to the narcotic drugs under international control as scheduled in the 1961 Convention and in the official notifications of the Secretary-General of the United Nations. **International non-proprietary names (INN) recommended by the World Health Organization are printed in bold type.**
- The chemical names/descriptions listed in the *4th column* provide additional information for easier identification of the scheduled narcotic drugs.

Part 2 provides a list of the preparations of narcotic drugs exempted from some provisions and included in Schedule III of the 1961 Convention.

Part 3 provides a list (in alphabetical order) of names and trade names of known preparations of narcotic drugs listed in the Schedules of the 1961 Convention.

Please note: *The frequent introduction of new preparations of narcotic drugs and the withdrawal of old ones by the pharmaceutical industry makes the regular updating of the present "Yellow List" necessary for the effectiveness of controls. In pursuit of this objective, the International Narcotics Control Board (INCB) maintains a database containing a list of such preparations. Therefore, Governments are kindly requested to inform INCB of any additions, deletions or amendments that should be made to the present list.*

Part 4 contains tables showing the pure anhydrous drug content of esters, ethers and salts of narcotic drugs listed in the Schedules as well as the equivalents of certain extracts and tinctures, in terms of the pure anhydrous drug.

For more specific information on the names used for narcotic drugs under international control and preparations containing these narcotic drugs, as well as on chemical and structural formulae and other technical information, please see the "Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control" (ST/NAR/1/REV.2) ¹.

PREPARATIONS OF NARCOTIC DRUGS EXEMPTED FROM SOME PROVISIONS AND WHICH ARE INCLUDED IN SCHEDULE III OF THE 1961 CONVENTION

Preparations of

1. ACETYLDIHYDROCODEINE,
CODEINE,
DIHYDROCODEINE,
ETHYLMORPHINE,
NICOCODINE,
NICODICODINE,
NORCODEINE,
PHOLCODINE

when compounded with one or more other ingredients and containing not more than 100 milligrams of the drug per dosage unit and with a concentration of not more than 2.5 per cent in undivided preparations.

2. **PROPIRAM**

containing not more than 100 milligrams of **PROPIRAM** per dosage unit *and compounded with* at least the same amount of methylcellulose.

3. **DEXTROPROPOXYPHENE**

for oral use containing not more than 135 milligrams of **DEXTROPROPOXYPHENE** base per dosage unit or with a concentration of not more than 2.5 per cent in undivided preparations, provided that such preparations do not contain any substance controlled under the 1971 Convention on Psychotropic Substances.

4. **COCAINE**

containing not more than 0.1 per cent of cocaine calculated as **COCAINE** base; and
OPIUM or **MORPHINE**

containing not more than 0.2 per cent of **MORPHINE** calculated as anhydrous **MORPHINE** base *and compounded with one or more other ingredients* and in such a way that the drug cannot be recovered by readily applicable means or in a yield which would constitute a risk to public health.

5. **DIFENOXIN**

containing, per dosage unit, not more than 0.5 milligram of **DIFENOXIN** and a quantity of atropine sulfate equivalent to at least 5 per cent of the dose of **DIFENOXIN**.

6. **DIPHENOXYLATE**

containing, per dosage unit, not more than 2.5 milligrams of **DIPHENOXYLATE** calculated as base and a quantity of atropine sulfate equivalent to at least 1 per cent of the dose of **DIPHENOXYLATE**.

7. *Pulvis ipecacuanhae et opii compositus*

10 per cent **OPIUM** in powder;
10 per cent ipecacuanha root, in powder well mixed with
80 per cent of any other powdered ingredient containing no drug.

8. Preparations conforming to any of the formulas listed in this Schedule and mixtures of such preparations with any material which contains no drug.

NAMES, SYNONYMS AND TRADE NAMES OF KNOWN PREPARATIONS OF NARCOTIC DRUGS LISTED IN THE SCHEDULES OF THE 1961 CONVENTION

This part contains a list in alphabetical order of names given to the narcotic drugs under international control and their known preparations in addition to the names listed in the respective Schedules of the 1961 Convention or Groups of the 1931 Convention. The names of narcotic drugs in the 1961 Convention and INNs are printed in bold type. They are accompanied by a pages reference to part 1, where the chemical formulae and trivial names of narcotic drugs, if they exist, can be found. Synonyms and isomers are also cross-referenced to the names of the narcotic drugs as listed in part 1 of this document, which includes other descriptions or their chemical names.

The other names (mainly synonyms or trade names) either apply to pure narcotic drugs, their salts or to preparations containing either the pure substance or its salt form; in such cases, reference is made to the designations in part 1. Preparations containing narcotic drugs under international control may have the same name but different formulations, furthermore, the same names may be used for different drugs or preparations in different countries. In such cases, reference should be made to the composition as indicated on the product label, and the denomination for the substance in question should always be checked against its chemical designation or formula.

A preparation may contain, in addition to internationally controlled narcotic drugs, other non-controlled drugs. Such a preparation is subject to the same measures of control as the narcotic drug that it contains, and, if it contains more than one drug, to the measures applicable to the most strictly controlled of those narcotic drugs.

The below list of trade names is meant for reference only and cannot be exhaustive, as such, the absence of the name of a preparation containing a narcotic drug does not necessarily mean that this preparation is not under international control. For further information on the names and the chemical and structural formula of the drugs, please see the *Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control* (ST/NAR/1/REV.2).

Table 2
Equivalents, in terms of the pure anhydrous drug, of extracts and tinctures

CANNABIS	One kilogram of tincture of cannabis is equivalent to about 100 grams of cannabis, i.e. the conversion factor is 1:10. In general, for cannabis extract preparations, 1 kilogram of extract of cannabis is equivalent to about 7 kilograms of cannabis. [In the case of the preparation Sativex® (10g cannabis per 10ml Sativex® solution), 1 kilogram of extract of cannabis should be considered to be equivalent to 12.6 kilogram of cannabis.]*
COCA LEAF**	One kilogram of tincture of coca leaf containing 0.1 per cent of cocaine, i.e. 1 gram of cocaine, should be considered to be equivalent to 200 grams of coca leaf. One kilogram of fluid extract of coca leaf containing 0.5 per cent of cocaine, i.e. 5 grams of cocaine, is equivalent to 1 kilogram of coca leaf.
OPIUM***	One kilogram of tincture of opium is equivalent to 100 grams of opium. One kilogram of extract of opium is equivalent to 2 kilograms of opium.

* According to the information supplied by the manufacturer.

** For the calculation of estimates and statistics in accordance with the terms of the 1961 Convention, coca leaf preparations containing more than 0.1 per cent of cocaine and made direct from coca leaf should be considered to be coca leaf (preparations).

*** For the calculation of estimates and statistics in accordance with the terms of the 1961 Convention, all preparations made direct from opium are considered to be opium (preparations). If the preparations are not made direct from opium itself but are obtained by a mixture of opium alkaloids (as is the case, for example, with pantopon, omnopon and papaveretum) they should be considered as morphine (preparations).
